BIOECONOMY in the H2020

H2020 – Framework Programme for Research & Innovation (2014-2020)

Excellent Science

Industrial Leadership

Societal Challenges

European Research Council (ERC)

Future and Emerging Technologies (FET)

Marie Skłodowska-Curie actions on skills, training and career development

European research infrastructures

- ICT
- Nanotechnology
- Biotechnology**
- Advanced Materials
- Advanced Manufacturing & Processing
- Space
- Access to Risk Finance
- Innovation in SMEs

- Health, demographic change and wellbeing
- Food security, sustainable agriculture and forestry, marine and maritime and inland water research and the Bioeconomy;**
- Secure, clean and efficient energy;
- Smart, green and integrated transport;
- Climate action, environment, resource efficiency and raw materials
- Europe in a changing world-Inclusive, innovative and reflexive societies
- Secure Societies: Protecting freedom and security of Europe and its citizens

BIOECONOMY in the H2020

SC2 – WP 16-17 – Sustainable Food Security

Resilient, resource-efficient value chains

- Abiotic stresses
- Biotic stresses
- Plant & animal breeding and conservation
- Pests & diseases
- Specific actions for organic farming
- Sustainable fisheries and aquaculture
- ERA-NETs + SME

25 topics 206 M€

EnvironmentClimate -smart primary production

- GHG emissions, environmental contamination of agriculture
- Specific production systems (legumes, permanent grassland, ...)
- Socio-economics of agriculture & farming for tomorrow
- ERA-NETs

7 topics 64 M€

Competitive food industry

- Food value chains & dynamics
- Competitiveness of agri-food chains
- Sustainable food packaging
- ERA-NET + SME

3 topics 24 M€

Healthy food and diets for all

- One Health co-fund (zoonoses)
- Impact of consumer practices in food safety
- Impulsivity & compulsivity, links with nutrition & lifestyle;
- Tackling childhood obesity
- sweeteners

5 topics 85,5M€

Call H2020-NMBP 2016-2017 - Biotechnology

Introduction & Challenges

Spectacular progress as enabling technology in various sectors; health, pharmaceutical, chemical & plant breeding.

Biotechnology-based industrial processes driving competitiveness & sustainability.

- Bridge the gap for lab to market. New approaches to valorising new feedstock resources and increasing overall bioprocess efficiencies.
- Speed up innovation, develop new bioprocess concepts, improved data integration and valorization of new production techniques.

Cutting-edge biotechnologies as future innovation drivers & Innovative and competitive platform technologies

- Contribute further to sectors such as health, chemicals and agriculture by developing new technological platforms.

JTI on Biobased Industries. What is BBI about?

What is the Bio-based Industries Initiative?

<https://www.youtube.com/watch?v=YioO3XQbTMO>

- A Public-Private Partnership between the **Bio-based Industries Consortium** and the **EU**
- A **joint** commitment of 3.7 billion € over 2014-2020
 - 0.975 billion € - EU
 - 2.7 billion € - Bio-based Industries Consortium:
In kind & in cash (0.975 bn €) + Additional activities (1.755 bn €)
- Annual Work Programmes

+

Biobased Industries Consortium

48

BIOECONOMY in the H2020

JTI on Biobased Industries. Focus

Focus

Feedstock

- Fostering a sustainable biomass supply and building new value chains

Biorefineries

- Optimising efficient processing through R&D and upscaling in large-scale demo/flagship biorefineries

Markets, products and policies

- Developing markets for bio-based products and optimising policy frameworks
